PROFESSIONAL EXPERIENCE

Full Stack Developer (Python & MERN) — Red Star / RAPL, Baddi, HP

Jan 2026 – Present

- **Achieved a 35% reduction in application response time**, as measured by backend query benchmarks, by redesigning and indexing MySQL and MongoDB queries and refactoring core Node.js/Express service logic.
- **Increased internal team efficiency by 40%**, as measured by reduction in manual task-completion time, by architecting and shipping a role-based admin dashboard using React.js, Redux Toolkit, and Node.js/Express REST APIs.
- **Cut manual operational workload by ~8 hours/week team-wide**, as measured by internal time-tracking logs, by designing, building, and containerizing (Docker) 3 internal automation tools in Python and Node.js for consistent, repeatable deployment.
- **Improved code quality and reduced regression bugs**, as measured by post-release defect counts, by introducing Test-Driven Development practices and establishing peer code-review standards adopted across the team, while mentoring 2 junior interns.
- **Delivered and scaled the company's live e-commerce platform (store.raplbaddi.com)**, as measured by 20+ resolved legacy bugs and 20+ live SKUs across 7 categories, by building a mobile-responsive storefront with WordPress/WooCommerce and wishlist functionality.
- **Strengthened full-stack ownership of the MERN pipeline**, as measured by a fully deployed role-based platform, by independently architecting WorkTrack — an attendance/task-management app with JWT authentication and Redux Toolkit state management.
